

Dear Prospective Parent/Guardian,

At East Fort Worth Montessori Academy, we know that choosing the right school for your child is very important. Thank you for taking time to research our school, visit our campus, and if you are interested, registering your child.

East Fort Worth Montessori Academy has been in the forefront for years in nurturing students. Our goal is to focus on the development of each student while respecting their unique qualities.

Our school facility is designed with the child in mind as they journey through their formative years. Our outdoor learning education is organically planned as nature intended it to be. Our students enjoy working outdoors with plants and animals because it is a natural remedy for brain plasticity.

Our instructors are highly qualified through the state of Texas and through advanced degrees and certifications. Our staff attends continuing education workshops and trainings to stay abreast of best practices, routines, and strategies.

The design of our school, programs, and quality of staff allows us to provide something different, like the feel of a refined private school. Our small community of staff will over the years contribute to the growth and development of your child. We provide a curriculum that meets state standards yet enriched with co-curricular enrichments keeps our students engaged, learning through hands-on application and processing critically.

We look forward to your families engagement, as research has shown that students of engaged parents show a great interest in learning.

On the pages below you will find more information on our admissions process.

Sincerely,
Mrs. Durosimi
E.F.W.M.A Superintendent
